

EICADD Center Ajman

Director's Report on Developmental Progress Assessment

Date of Visit: 15-12-2025

Child's Name: Ariana Ladha

Date of Birth: 04-07-2022

Overview

Ariana Ladha attended a developmental progress assessment at EICADD Center Ajman. The assessment findings indicate **information processing delays** and **global developmental delays**, which are currently contributing to **acquired features of autism**. At this stage, **further analysis is required** to better understand the contributing factors and to guide a more precise and effective intervention plan.

Recommended Plan

1) Development Protocol

- Implement a structured **development protocol targeting information processing** for a period of **4 months**, followed by a **reevaluation**, preferably **in person**.
- During the reevaluation, the intervention plan will be reviewed and a **clear baseline** will be established to assess progress and guide subsequent stages.
- **Continue with the current intervention plan** consistently throughout this period.

2) Recommended Therapy

After determining the contributing causes based on assessment findings and test results, the following is recommended:

- **Plasticity rehabilitation therapy, intensive**, planned as **intensive rehabilitation therapy after 4 months**, aligned with the reevaluation timeline and overall developmental progress.

Notes on External Testing

The recommended tests are conducted through **Neurazon (Canada)**, a bioinformatics company partnered with certified laboratories worldwide. Please refer to the plan provided by Neurazon for further information. Please note that these tests are **recommendations only**, are **not obligatory**, and are **not conducted directly through our center**.

Disclaimer

This report is a **developmental assessment** based on current observations and is **not a final diagnosis**. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada) as suggestions to support a deeper understanding of the child's developmental profile.

This report is **valid for 4 months** from the date of assessment.

Legal and Official Use Notice

This report is issued solely as a **developmental assessment report** and is **not valid for legalization, governmental, judicial, or official identification purposes**. In the **United Arab Emirates**, only the **Zayed Higher Organization for People of Determination** is authorized to issue official case or diagnostic reports for **People of Determination** identification or other official uses. This report is intended **solely for assessment and guidance purposes**.
