

## Director's Report on Developmental Progress Assessment

**Date of Visit:** 01-10-2025

**Child's Name:** Kanz Saed Haddadin

**Date of Birth:** 24-11-2019

**Gender:** Male

**Guardian:** Saed

---

### Overview

Kanz Saed Haddadin was assessed at our center on 01 October 2025. The evaluation showed that **Kanz has improved greatly on the first protocol**, reflecting positive progress in his developmental trajectory.

Despite this improvement, Kanz continues to present with **information-processing delays** and **developmental delays**, which have contributed to **acquired features of autism** related to **variants affecting development and neuroplasticity**. Continued early and targeted intervention is recommended to sustain progress and further reduce these acquired features.

---

### Recommended Plan

EICADD

#### 1) Development Protocol for Information Processing

- Continue with the tailored development protocol for **4 months**.
- Reassess after 4 months—preferably **in person**—to establish a new baseline and adjust the intervention plan accordingly.
- Maintain ongoing intervention to consolidate the gains already achieved.

---

#### 2) Main Recommended Analyses – Conducted through Neurazon (Canada)

##### Notes on External Testing:

The recommended tests are conducted through **Neurazon (Canada)**, a bioinformatics company partnered with certified laboratories worldwide. These tests are **external to our center**.

**Please note that they are recommendations and not obligatory**, and they are not carried out directly by EICADD. Parents are encouraged to refer to the plan provided by Neurazon for further details.

---

### 3) Recommended Therapy

- **Rehabilitation Therapy:**
  - Continue with current **Speech Therapy (ST)** and **Occupational Therapy (OT)**.
  - **Add Plasticity Rehabilitation Therapy – 2 sessions per week** to enhance information processing and developmental plasticity.

### Conclusion

Kanz has demonstrated notable improvement on the initial protocol, highlighting the effectiveness of early and tailored interventions. Continued adherence to therapy and periodic reassessment are crucial to sustaining and building on his progress.

### Disclaimer

This assessment is **not a final diagnosis** but a developmental evaluation based on current observations. Kanz Saed Haddadin is open to further improvement, and the findings may change with continued progress and intervention.

The recommended tests are external and provided through **Neurazon (Canada)**. These are suggestions, **not obligatory**, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.

This report remains **active for 4 months** from the date of assessment.

*This report is valid for 4 months from the date of assessment.*
