Director's Report on Developmental Progress Assessment

Date of Visit: 08-10-2025

Child's Name: Rayan Daa' Taj Al Din

Date of Birth: 13-10-2020

Gender: Male

Guardian: Daa'

Overview

Rayan visited our center for a follow-up developmental progress assessment. The evaluation showed **information-processing delays and developmental delays due to variants affecting brain development.**

Rayan demonstrated **significant improvement under the first intervention protocol**, indicating the importance of **continuous, uninterrupted intervention.**

He still presents **acquired features of autism** related to his developmental delays.

Recommended Plan

1. Development Protocol for Information Processing

- Continue the current protocol for **4 months**, then reassess, preferably **in-person**.
- At reassessment, establish a **new baseline** to adjust the plan as needed.
- Maintain **consistent intervention** without interruption.

2. Recommended Tests through Neurazon (Canada)

Note: The recommended tests are conducted through **Neurazon (Canada)**, a bioinformatics company partnered with certified laboratories worldwide.

These are **suggestions, not obligatory**, and are **not conducted directly through our centers**. Please refer to the plan provided by Neurazon for more details.

3. Recommended Therapy

- **Plasticity rehabilitation therapy** (to be continued in Jordan after occupational therapy and sensory-integration sessions).
- **Speech Therapy:** 3 sessions per week.
- **Occupational Therapy:** 3 sessions per week.
- **Occupational Therapy / Light Therapy:** 2 sessions per week — **Gamma (> 30 Hz only)**.

Conclusion

This assessment reflects Rayan's **current developmental status** and guides the next phase of intervention. His **progress confirms the benefit of ongoing therapy without pauses**, and further gains are expected with continued adherence to the recommended protocol and therapies.

Disclaimer

This assessment is **not a final diagnosis** but a **developmental evaluation based on current observations**.

The child remains **open to improvement**, and findings may change with progress and intervention.

The recommended tests are **external and optional** through **Neurazon (Canada)**.

This report is **valid for 4 months** from the date of assessment.

This report is valid for 4 months from the date of assessment.
