

## Director's Report on Developmental Progress Assessment

**Date of Visit:** 03-12-2025

**Child's Name:** Youssif Alzuwawi

**Date of Birth:** 16-03-2025

**Gender:** Male

**Guardian:** —

### Overview

Youssif Alzuwawi visited our center for a developmental progress assessment. During the evaluation, Youssif demonstrated **information processing delays and developmental delays**, which have begun leading to **acquired hyperlexia features**. His profile currently aligns **between Hyperlexia Type 2 and Type 3**, but he is **not fully at Hyperlexia 3** at this stage.

These hyperlexia-related features appear **secondary to developmental and information processing delays**, not indicative of a primary autism diagnosis. The child's developmental pattern shows early reading-related tendencies alongside challenges in comprehension, regulation, and processing.

Further detailed analyses are required to fully understand the underlying neurodevelopmental contributors and to guide the long-term intervention plan.

### Recommended Plan

#### 1) Development Protocol for Information Processing

- Implement the **Information Processing Development Protocol** for **4 months**.
- Reevaluate Youssif **in person** after 4 months to establish a new baseline and adjust the plan.
- Continue the structured intervention plan consistently to support neuroplasticity and developmental stabilization.

#### 2) Recommended Tests Through Neurazon (Canada)

(External — Not conducted through our center)

### 3) Recommended Therapy

- **Plasticity Rehabilitation Therapy**, 2–3 sessions per week **after completing the initial 4-month protocol**.
- This therapy is essential for strengthening information processing, cognitive development, and functional skills.

#### Notes on External Testing

The recommended tests are conducted through **Neurazon (Canada)**, a bioinformatics company partnered with accredited international laboratories.

These analyses are **external, not obligatory**, and **not performed directly** through our center. Please refer to the plan provided by Neurazon for additional details.

#### Disclaimer

This assessment is **not a final diagnosis**, but a developmental evaluation based on current observations.

The child is open to improvement, and findings may change with intervention and progress.

The recommended tests are external suggestions provided through Neurazon (Canada).

**This report is valid for 4 months from the date of assessment.**

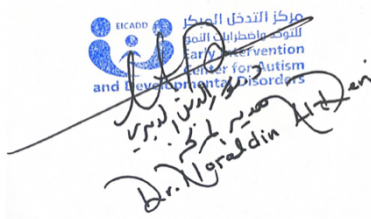

#### Centers' Leading Staff:

**Speech Therapist:** Ms. Amira Alomari

**Occupational Therapist:** Ms. Malak Jaber

**Psychologist and behaviour therapist (Ajman):** Ms. Asmaa Alshanawi

#### EICADD Center Director

A handwritten signature in black ink, reading "Dr. Noraldin Al-Dan", is written over a circular stamp. The stamp contains the EICADD logo and the text "مركز التدخل المبكر للتوحد واضطرابات النمو Early Intervention Center for Autism and Developmental Disorders".
