

Director's Report on Developmental Progress Assessment

Date of Visit: 22-06-2025

Child's Name: Leyan-Mahmoud Hamdan

Date of Birth: 12-01-2021

Overview:

Leyan was assessed at our center to evaluate his developmental and cognitive progress. The results indicate **information processing delays**, **cognitive developmental delays**, and the presence of **acquired features of autism**. These features appear to be secondary to the underlying delays rather than indicative of true autism. At this stage, a final diagnosis is not determined, and further assessments are necessary to better understand the contributing factors and support a tailored intervention plan.

Recommended Plan:

1. Development Protocol for Information Processing:

- Initiate a focused intervention program targeting information processing delays for **4 months**.
- A **reassessment is recommended after 4 months**, ideally in person.
- During this time, establish a developmental baseline and continue refining the plan based on Leyan's progress.

2. Recommended Tests through Neurazon (Canada):

Please refer to the plan provided by Neurazon for further information. Please note that these are recommendations and not obligatory, and they are not conducted through our centers directly.

3. Recommended Therapy After Determining the Causes:

- **Speech Therapy (ST):** 2 sessions per week
- **Occupational Therapy (OT):** 2 sessions per week
- **Mitotherapy (Light Therapy):** 2 sessions per week
- **Neuroplasticity Rehabilitation Therapy:** Intensive program to be conducted in the UAE or when available in Jordan

Disclaimer:

This assessment is not a final medical diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.

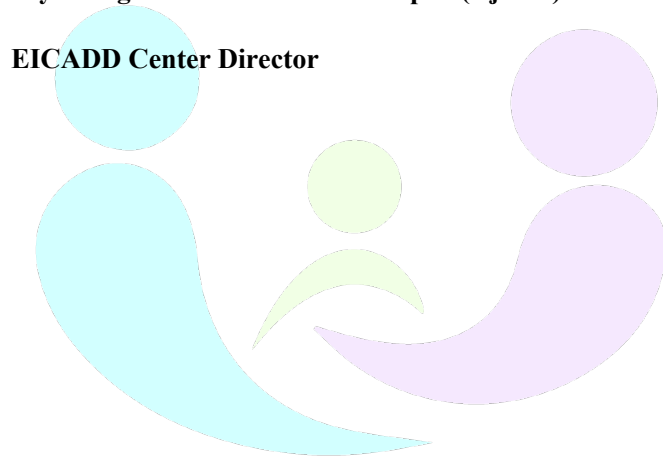

Centers' Leading Staff:

Speech Therapist: Ms. Amira Alomari

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi
