
Director's Report on Developmental Progress Assessment

Date of Visit: 21-07-2025

Child's Name: Faisal Mohammed Said Mahad

Date of Birth: 01-05-2020

Overview:

Faisal was assessed and found to have **information processing delays, global developmental delays**, and acquired features resembling autism. However, based on the assessment, the child does not meet the criteria for a diagnosis of classical autism. Genetic findings indicate a variant affecting neurological development and **epileptic activity**, which may explain the observed delays. Previous **MRI findings confirm the presence of white matter delays**, further supporting the diagnosis of developmental delay rather than autism.

Recommended Plan:

1. Development Protocol for Information Processing:

- Duration: **4 months**
 - **In-person reassessment** afterward to reestablish developmental baseline
 - Continue with individualized intervention protocol
-

Recommended Tests through Neurazon (Canada):

Please refer to the plan provided by Neurazon for further information. Please note that these are recommendations and not obligatory, and they are not conducted through our centers directly. These test are not done at EICADD.

Recommended Therapy:

- Continue **developmental therapy in the home country**
 - Begin **intensive Neuroplasticity Rehabilitation Therapy** as soon as possible
-

Disclaimer:

This assessment is not a final diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the

child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.

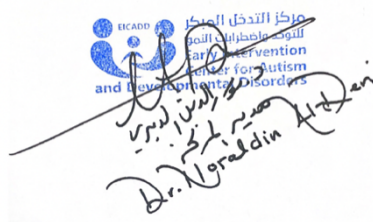

Centers' Leading Staff:

Speech Therapist: Ms. Amira Alomari

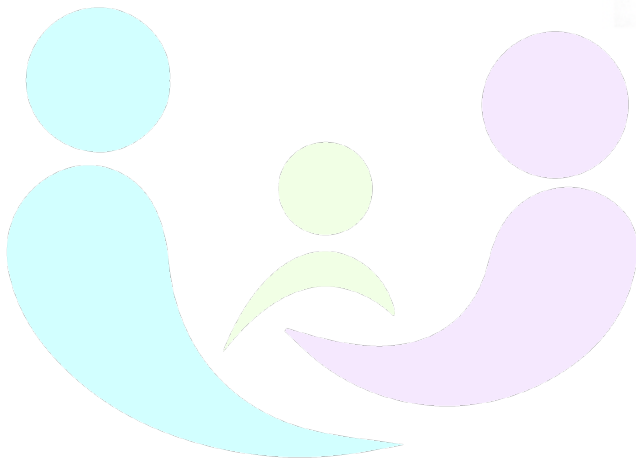

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi

EICADD Center Director

Dr. Noraddin Al-Dan
