

Director's Report on Developmental Progress Assessment

Date of Visit: 10-05-2025

Child's Name: Abdulaziz Baitishaq

Date of Birth: 28-07-2019

Age: 5 years

Gender: Male

Guardian: Sulaiman

Overview:

Abdulaziz Baitishaq was assessed through an **in person evaluation**, during which he displayed clear signs of **information processing delays**, **intellectual developmental delays**, and **acquired features of autism**. These features appear to be secondary to underlying physiological or neurological imbalances that require further investigation.

Recommended Plan:

1. Development Protocol for Information Processing

- Initiate a tailored intervention program focused on cognitive processing and intellectual development.
- Duration: **4 months**, followed by a reevaluation preferably **in person** to observe changes directly.
- Establish a clear **developmental baseline** and track measurable improvements over time.
- Continue with therapy and supportive strategies aimed at reversing acquired features.

2. Recommended Therapy (Post-Test):

- After test results are received and reviewed, initiate **Intensive Neuroplasticity Rehabilitation Therapy** to stimulate targeted brain networks responsible for cognition, communication, and adaptive behavior.

Conclusion:

This report represents a **preliminary assessment** of Abdulaziz's neurodevelopmental status. While signs of acquired autism and intellectual delay are present, they appear to be **modifiable** through biomedical investigation and targeted intervention. The child should be reassessed in person following the outlined testing to develop a finalized and individualized therapy plan. This is not a final medical diagnosis, it is a developmental analysis for rehabilitation purposes.

Center's Leading Staff:

Speech Therapist: Ms. Amira Alomari

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist: Ms. Asmaa Alshanawi

EICADD Center Director

The signature of Dr. Noraldin is written in black ink over a blue circular stamp. The stamp contains the EICADD logo and the text 'مركز التدخل المبكر للتوحد واضطرابات النمو Early Intervention Center for Autism and Developmental Disorders'.
