Director's Report on Developmental Progress Assessment

Date of Visit: 06-07-2025

Children's Names:

1. Reham Fahad Shebeeb Al Juweisri
2. Mariam Fahad Shebeeb Al Juwaisiri

Date of Birth: 07-05-2018

Overview:

Reham and Mariam Fahad Shebeeb Al Juweisri, identical twins, were assessed at our center for developmental progress. Both children present with significant information processing delays and features of cognitive developmental delays. These delays have led to acquired features that resemble autism. These features appear to be the result of functional and cognitive challenges rather than genetic autism. Further assessment is necessary to clarify the underlying causes and to guide targeted intervention.

Recommended Plan:

1. **Development Protocol for Information Processing:**
 - Begin a non-medicinal, structured protocol for both children, customized to their processing and cognitive profiles.
 - Maintain this protocol for 4 months.
 - Reevaluate both children in person to measure progress and reestablish their developmental baseline.
 - Adjust and continue the intervention plan based on the follow-up assessment.
2. **Recommended Tests through Neurazon (Canada):**

Please refer to their report and assessment. These tests are not done at EICADD.

3. **Recommended Therapy:**
 - **Speech and Occupational Therapy (in their home country):**
 - Should be started promptly and maintained consistently to support communication and functional development.
 - **Neuroplasticity Rehabilitation Therapy:**
 - Begin as soon as possible to stimulate brain adaptability and support both cognitive and behavioral improvement.

Disclaimer:

This assessment is not a final diagnosis but a developmental evaluation based on current observations. Both Reham and Mariam are capable of significant improvement with continued intervention. The findings may change as progress is made. The recommended tests are external and performed through Neurazon (Canada). These recommendations are optional and are intended to guide future planning. Please refer to the official Neurazon documentation for more details. These tests are not performed directly through our center.

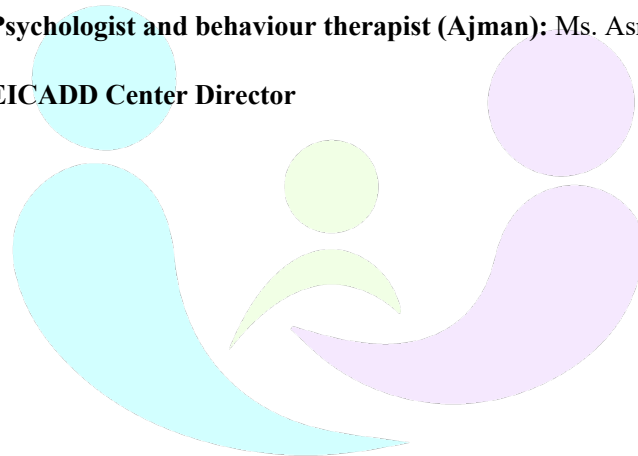

Centers' Leading Staff:

Speech Therapist: Ms. Amira Alomari

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi
