

Director's Report on Developmental Progress Assessment

Date of Visit: 22-06-2025

Child's Name: Mohammad Al Hunaiti

Date of Birth: 29-09-2021

Overview:

Mohammad was assessed at our center as part of ongoing monitoring for developmental progress. The evaluation showed **information processing delays** and **developmental delays**, which initially contributed to **acquired features of autism**. However, it is important to note that **this is not a case of true autism**, and the child has already shown **significant improvement** since starting early intervention. The case remains **open to further improvement**, and ongoing therapy is expected to yield continued positive outcomes.

Recommended Plan:

1. Development Protocol for Information Processing:

- Continue the tailored developmental protocol for **4 to 6 months**.
- Conduct a full **reevaluation after this period**, ideally in person.
- Reassess the child's progress, establish a new baseline, and continue with a refined therapy plan based on improvements.

2. Recommended Analysis:

Please refer to the plan provided by Neurazon for further information. These tests are external and optional, and are not conducted directly through our centers.

3. Recommended Therapy Plan:

- **Speech Therapy (ST):** 2 sessions per week
- **Occupational Therapy (OT):** 2 sessions per week
- **Light Therapy (LT/Mitotherapy):** 2 sessions per week
- **Neuroplasticity Rehabilitation Therapy:** Intensive therapy block in the UAE

Disclaimer:

This assessment is not a final medical diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.

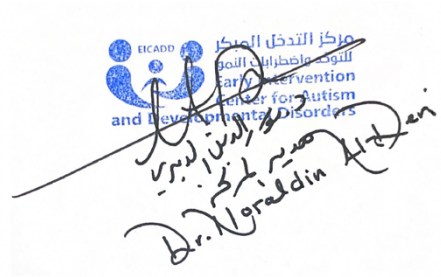

Centers' Leading Staff:

Speech Therapist: Ms. Amira Alomari

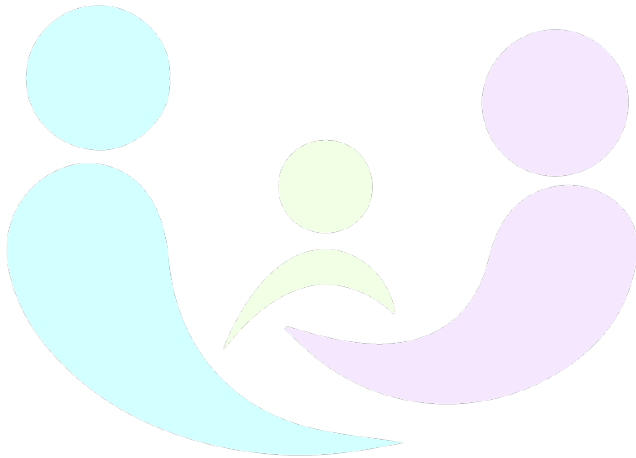

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi

EICADD Center Director

Dr. Ngraldin Al-Dan
