

## **Director's Report on Developmental Progress Assessment**

**Date of Visit:** 03-07-2025

**Child's Name:** Muayed Hamid Mohamed Fraish Al Wahaibi

**Date of Birth:** 2010-07-08

### **Overview:**

Muayed Hamid Mohamed Fraish Al Wahaibi visited our center for a developmental evaluation. The assessment identified information processing delays, cognitive developmental delay features, and intellectual developmental delays. These factors have contributed to acquired features resembling autism; however, they do not reflect a definitive case of Autism Spectrum Disorder. The delays appear to be driven by underlying neurological and functional causes that require further investigation and consistent intervention.

### **Recommended Plan:**

1. **Development Protocol for Information Processing:**
  - Implement a structured, individualized developmental protocol.
  - Continue this approach for 4 months.
  - Reevaluate the child after this period, preferably in person, to establish a new baseline and monitor progress.
  - Adjust the intervention plan accordingly based on observed improvements and findings.
2. **Recommended Tests through Neurazon (Canada):**
  - Please refer to their report and assessment.
3. **Recommended Therapy:**
  - **Speech and Occupational Therapy (in Oman):**
    - These therapies should begin promptly and be tailored to support communication, processing, and daily functional skills.
    - Coordination with local providers in Oman is essential for consistency and effective implementation.

### **Disclaimer:**

This assessment is not a final diagnosis but a developmental evaluation based on current observations. Muayed is capable of improving, and the findings may change with progress and appropriate intervention. The recommended tests are external and provided through Neurazon (Canada). These are non-obligatory suggestions intended to help clarify the underlying causes of

developmental delays. Please refer to the plan provided by Neurazon for further information.  
These tests are not conducted directly through our center.

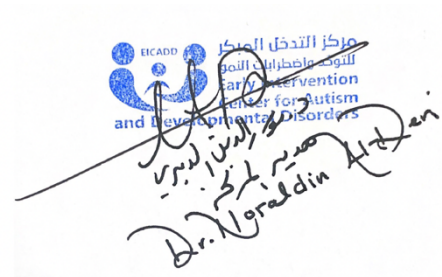

**Centers' Leading Staff:**

**Speech Therapist:** Ms. Amira Alomari

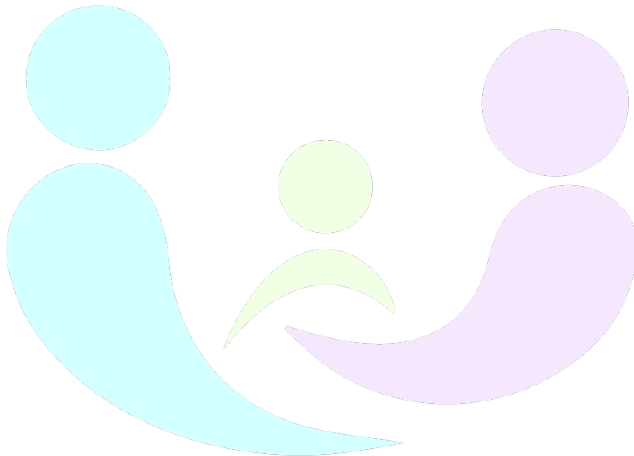

**Occupational Therapist:** Ms. Malak Jaber

**Psychologist and behaviour therapist (Ajman):** Ms. Asmaa Alshanawi

**EICADD Center Director**
