

Director's Report on Developmental Progress Assessment

Date of Visit: 26-06-2026

Child's Name: Hamza-Mohammad Odeh

Date of Birth: 27-06-2017

Age: 9 years

Gender: Male

Guardian: Mohammad

Overview:

Hamza-Mohammad was assessed at our center and presents with **information processing delays** and **developmental delays**. These have resulted in **acquired features of autism**, presenting as **hyperlexia** that is currently closer to **Hyperlexia Type 2**, with a trajectory toward **Type 3** if guided with appropriate intervention. The child does **not currently meet the criteria for classical autism**, and further targeted analysis is necessary to understand the underlying causes.

Recommended Plan:

- Development Protocol for Information Processing**
 - Duration: 4 months
 - In-person reassessment recommended
 - Establish baseline and adjust based on response
- Recommended Tests (through Neurazon – Canada):**

Please refer to their report and assessment.

- Recommended Therapy (Post-Test):**
 - Mitotherapy:** 2–3 light therapy sessions weekly
 - Occupational Therapy (OT):** 2 sessions weekly
 - Neuroplasticity Therapy Intensive**

Disclaimer:

This assessment is not a final medical diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.

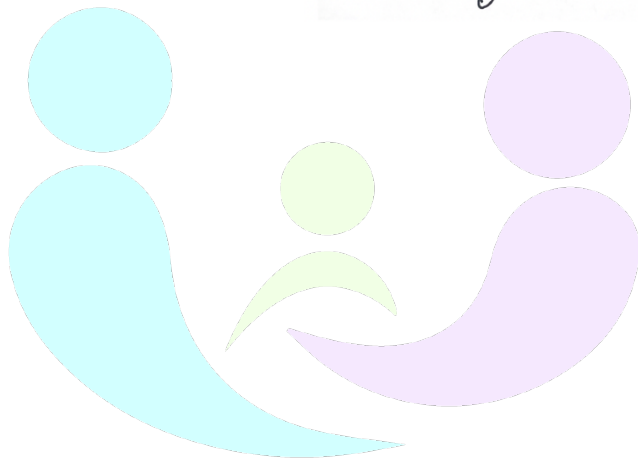

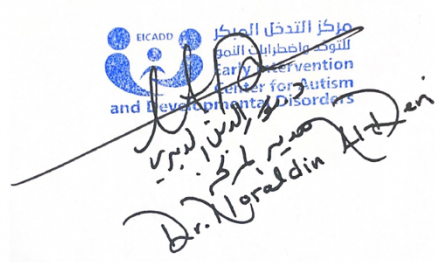

Centers' Leading Staff:

Speech Therapist: Ms. Amira Alomari

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi
