

## Director's Report on Developmental Progress Assessment

**Date of Visit:** 22-06-2025

**Child's Name:** Renad-Malik AlBaddawi

**Date of Birth:** 09-07-2015

### Overview:

Renad was assessed at our center due to concerns regarding her cognitive and developmental progress. The evaluation revealed clear **information processing delays** and **cognitive developmental delays**, along with **acquired features of autism**. These findings are not consistent with classical autism but reflect developmental disruptions that can be addressed with targeted intervention. Further analysis is recommended to identify the contributing factors and guide a personalized treatment plan.

### Recommended Plan:

#### 1. Development Protocol for Information Processing:

- Begin a structured development protocol for **4 months** targeting cognitive and processing delays.
- Reassessment is recommended **after 4 months**, preferably in person.
- Establish a baseline to monitor improvement and guide further interventions.

#### 2. Recommended Tests through Neurazon (Canada):

*Please refer to the plan provided by Neurazon for further information. Please note that these are recommendations and not obligatory, and they are not conducted through our centers directly.*

#### 3. Recommended Therapy After Determining the Causes:

- **Speech Therapy (ST):** 2 sessions per week
- **Occupational Therapy (OT):** 2 sessions per week
- **Mitotherapy (Light Therapy):** 2 sessions per week
- **Neuroplasticity Therapy:** Intensive program in the UAE, or when available, in Jordan

**Disclaimer:**

This assessment is not a final medical diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.

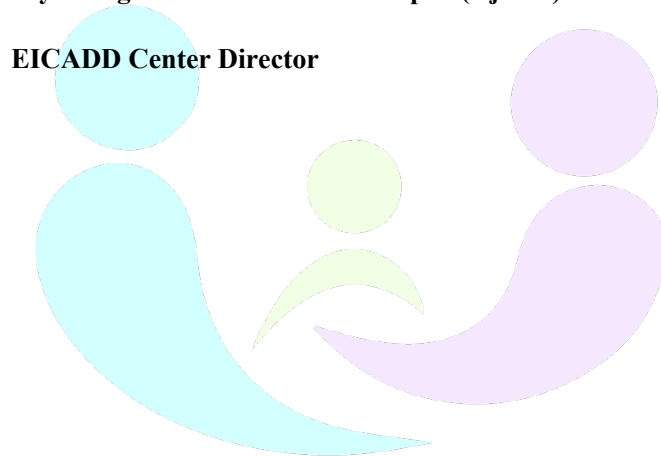

**Centers' Leading Staff:**

**Speech Therapist:** Ms. Amira Alomari

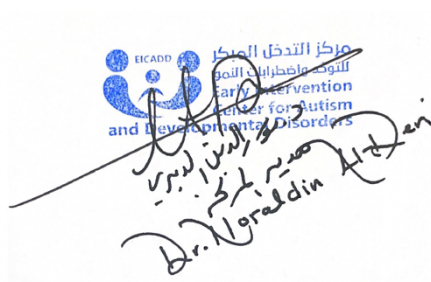

**Occupational Therapist:** Ms. Malak Jaber

**Psychologist and behaviour therapist (Ajman):** Ms. Asmaa Alshanawi

**EICADD Center Director**

**EICADD**

Dr. Noraldin Al-Dani
