

Director's Report on Developmental Progress Assessment

Date of Visit: 02-06-2025

Child's Name: Saeed Mohammed Albawardi

Date of Birth: 24-02-2022

Age: 3 years

Gender: Male

Guardian: Mohammed

Overview:

Saeed was evaluated and demonstrated **information processing delays** and **developmental delays**, with **acquired features of autism**. Further analysis is required to better understand the causes and refine the intervention plan.

Recommended Plan:

1) Development Protocol for Information Processing:

- Implement a **targeted development protocol** to support information processing and address developmental challenges.
- **Duration:** 4 months, with a reevaluation afterward (preferably in person) to track progress and make adjustments as needed.

2) Main Recommended Tests (via Neurazon – Canada):

Please refer to their assessment. *These tests are external, conducted by Neurazon (Canada), and are not performed at our center.*

3) Recommended Therapy After Determining the Causes:

- **Neuroplasticity Rehabilitation Therapy (2-3 per week after 1.5/ 2 months)**
- **Speech and Occupational Therapy**
 - Both therapies are essential to improve communication, sensory integration, and daily living skills.

Disclaimer:

This assessment is not a final medical diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.

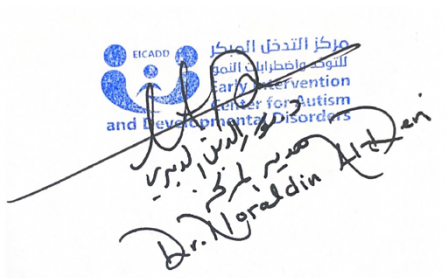

Centers' Leading Staff:

Speech Therapist: Ms. Amira Alomari

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi
