

Director's Report on Developmental Progress Assessment

Date of Visit: 12-08-2025

Child's Name: Jamal Aldin, Abo Wasel Ealimi

Date of Birth: 21-06-2020

Overview:

Jamal Aldin, Abo Wasel Ealimi was assessed in person at our center. The evaluation indicates **information processing delays** and **hyperlexia features closer to Hyperlexia 2** (acquired features of high-functioning autism), though not fully presenting as such. With proper intervention, there is potential for development towards **Hyperlexia 3**, which carries better adaptive and social outcomes.

Further analysis is required to fully understand the underlying causes and to personalize the intervention plan.

Recommended Plan:

1. **Development Protocol for Information Processing:**
 - Continue for 4 months, followed by a reevaluation (preferably in person).
 - Reassess the plan and establish an updated baseline.
 - Continue with the intervention program based on progress.
2. **Recommended Tests (through Neurazon, Canada):**
 - **Please refer to their report and assessment. These analyses are not done at EICADD.**
3. **Recommended Therapy:**
 - **Neuroplasticity Rehabilitation Therapy** (intensive) to begin in 2–4 months, targeting cognitive, language, and adaptive functioning.

END OF REPORT

Disclaimer:

This assessment is not a final diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.

Centers' Leading Staff:

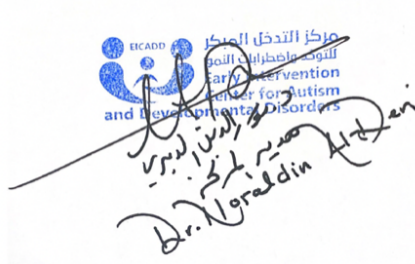

Speech Therapist: Ms. Amira Alomari

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi

EICADD Center Director

EICADD

Dr. Noraddin Al-Dan
