Director's Report on Developmental Progress Assessment
Date of Visit: 17-08-2025
Child's Name: Rayan Abdulrahman T Al Harbi
Date of Birth: 07-10-2013
Sex: Male
Guardian: Abdulrahman

Overview

Rayan was assessed in person at our center. Findings indicate **information processing delays** and **developmental delays** leading to **hyperlexia between Types 2 and 3**. According to the history, MRI has shown **white matter delays**, which may contribute to learning pace and language profile. The child is open to improvement, and **further assessment and testing** are recommended to refine the intervention plan.

Recommended Plan

1. **Development Protocol for Information Processing**

- Implement for 4 months, then reassess in person.
- Reevaluate the plan and establish a clear baseline.
- Continue with the intervention according to observed progress.

2. **Main Recommended Analyses**

Recommended Tests through Neurazon (Canada): Please refer to the plan provided by Neurazon for further information. These are recommendations and not obligatory, and they are not conducted through our centers directly.

3. **Therapy**

- **Neuroplasticity rehabilitation therapy:** intensive program to start as soon as possible.

Disclaimer

This assessment is **not a final diagnosis** but a developmental evaluation based on current observations. The child is open to improvement, and findings may change with progress and intervention. The recommended tests are external and provided through **Neurazon (Canada)** to support a deeper understanding of the child's developmental profile.

Centers' Leading Staff:
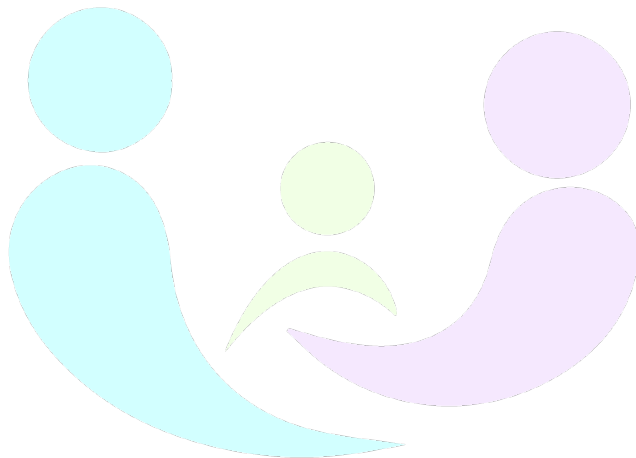

Speech Therapist: Ms. Amira Alomari

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi
