

Director's Report on Developmental Progress Assessment

Date of Visit: 26-06-2025

Child's Name: Hashem-Saeed Albayaydah

Date of Birth: 14-02-2018

Age: 7 years

Gender: Male

Guardian: Saeed

Overview:

Hashem-Saeed was assessed at our center and shows signs of **information processing delays** and **developmental delays**. These delays have led to **acquired features of autism**, which may improve with appropriate intervention. Further testing is recommended to clarify underlying causes and guide the next phase of therapy.

Recommended Plan:

1. **Development Protocol for Information Processing**
 - Implement for 4 months
 - Reassess in person to monitor progress
 - Establish baseline and adapt the plan based on response
2. **Recommended Tests (through Neurazon – Canada):**

Please refer to their report and assessment.

3. **Recommended Therapy:**
 - **Mitotherapy:** 2 light therapy sessions per week
 - **Occupational Therapy (OT):** 2 sessions per week
 - **Speech Therapy (ST):** 2 sessions per week

Disclaimer:

This assessment is not a final medical diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.

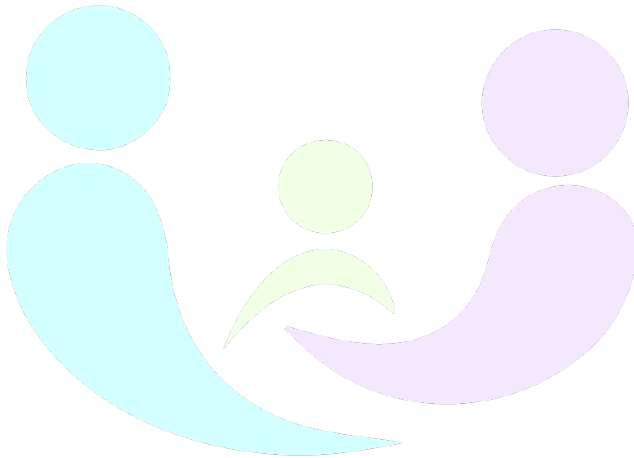

Centers' Leading Staff:

Speech Therapist: Ms. Amira Alomari

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi
