ADDITIONAL INFORMATION

- A revaluation is needed to reassess the development on the Ai
- Start the second step of the protocol after three months
- This assessment was developed, and its performance was validated, by the Ai model of NEURAZON and according to the findings in the report attached. The US Food and Drug Administration (FDA) has determined that clearance or approval of this method is not necessary and thus neither have been obtained. This test has been developed for research purposes. All test results are reviewed, interpreted and reported by our scientific experts.
- The provided recommendations include safe, non-drug, and natural treatments that are not a substitute for rehabilitation and training sessions. These recommendations should be followed under the supervision of a specialist. Improvement depends on the child, the underlying causes, and their response, with recommendations adjusted based on periodic tests and evaluations every three months. If any allergic symptoms appear, treatment should be stopped immediately, and the specialist should be informed to adjust the treatment plan.
- This assessment is not a substitute for a medical assessment by a healthcare professional at a medical clinic. Please note, that this plan has been designed by our team of scientists, but we advise you to contact a physician as well to have a more holistic approach

Assessment: The child improved greatly on the first step. The child has Information processing delays and delays in development which led him to acquire hyperlexia due to mitochondrial issues as shown in the neurazon's analysis. The child is getting closer to hyperlexia 3 but still not fully and needs further work and analysis.

Recommended Plan:

- 1) Development Protocol for the information processing
 - For 4 months then we reevaluate the child, preferably in person
 - Reevaluate the plan and establish a baseline
 - Continue with the intervention plan

Other Recommendations:

- 1) Recommended testing that might be needed after 4 months:

Recommended through Canada: Neuronal Growth Factors Absorption analysis screening – Neurazon (Canada)

A more detailed analysis of the absorption

Hair sample

2 months business days to get the results

Repeated every 6-12 months

Recommended through Canada: Functional Pathways Analysis – Neurazon (Canada)

A more detailed analysis of the pathways

Urine sample

2 months business days to get the results

Repeated every 6-12 months

- 2) Recommended Therapy:

Rehabilitation (2ST and 2OT and 2 mitotherapy)
