**Director's Report on Developmental Progress Assessment**

**Date of Visit:** 02-08-2025

**Child's Name:** Ammar-Yaser Awad

**Date of Birth:** 24-10-2016

**Age:** 8 years

**Gender:** Male

**Guardian:** Yaser

---

**Overview:**

Ammar-Yaser Awad was assessed at our center for developmental progress. The child has **shown great improvement on the first protocol**, demonstrating responsiveness to the intervention plan. The child was assessed by Osthathna.

The evaluation indicates **information processing delays, developmental delays, and cognitive delays**, which have led to **acquired features of autism**. Genetic review shows **variants affecting brain development and synaptic health**. The child is capable of further improvement with continued intervention. **Additional analyses may be required** depending on progress in the next evaluation.

---

**Recommended Plan:**

1. **Development Protocol for Information Processing**
    - Continue for 4 months, followed by in-person reassessment.
    - Reevaluate the plan and establish a new baseline.
    - Continue with the intervention plan based on progress.
  2. **Recommended Analyses through Neurazon (Canada):**
    - Further analyses will be considered after the next evaluation to determine the exact requirements and focus areas.
  3. **Recommended Therapy:**
    - **2 Mitotherapy sessions per month**
    - **2 Occupational Therapy (OT) sessions per week**
    - **2 Speech Therapy (ST) sessions per week**
- 

**Disclaimer:**

This assessment is not a final diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.
