

Child Developmental Assessment Report

Date of Visit: 04-06-2025

Child's Name: Joanna Abusafia

Date of Birth: 2012-05-21

Age: 156 months (13 years)

Gender: Female

Assessment Summary:

Joanna was assessed for developmental concerns and was found to have information processing delays and developmental delays that are leading to learning difficulties. Further analysis is necessary to better understand the underlying factors and to create an effective, targeted intervention plan.

Recommended Plan:

1. **Development Protocol for Information Processing**
 - Implement the protocol for a duration of 4 months.
 - After this period, a comprehensive in-person reevaluation will be conducted to establish a baseline and update the intervention plan as needed.
 - Continue with the intervention plan based on the outcomes of the reevaluation.
2. **Recommended Tests:**

Disclaimer: These tests are external and conducted through Neurazon (Canada). It is not obligatory and is not performed directly through our center. The test is recommended as a supportive measure to understand the child's developmental profile better.

3. **Recommended Therapy after Analysis:**

- Intensive neuroplasticity therapy to start as soon as possible, tailored to the findings of the recommended tests and ongoing progress.

Disclaimer:

This assessment is not a final medical diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.

Centers' Leading Staff:

Speech Therapist: Ms. Amira Alomari

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi
