

Director's Report on Developmental Progress Assessment

Date of Visit: 25-05-2025

Child's Name: Mawadah Maher Jaber

Date of Birth: 26-09-2019

Age: 5 years

Gender: Male

Guardian: Zainab

Overview:

Mawadah Maher Jaber was assessed at our center on May 25th, 2025. The child shows signs of **information processing delays** and **intellectual developmental delays**, which have contributed to the development of **acquired features of autism**. These features do not reflect classical autism, but rather a result of the delays impacting communication, interaction, and behavior patterns.

Further testing is recommended to identify contributing biological and functional factors in order to personalize an effective intervention strategy.

Recommended Plan:

1. Development Protocol for Information Processing:

- Continue the developmental intervention protocol for a period of **4 months**
- Conduct an **in-person reevaluation** after the 4-month period
- Establish a **clinical baseline** and modify the plan as needed based on observed progress

2. Main Recommended Analysis (conducted through Neurazon – Canada):

Please refer to there assessment and report. *These tests are provided externally through Neurazon (Canada) and are not mandatory, but they are strongly recommended to guide a precision-based care plan.*

3. Recommended Therapy After Determining the Causes:

- **Mitotherapy Therapy** – Frequency to be determined based on absorption analysis results
- **Neuroplasticity Therapy** – To begin in **September** or when ready
- **Speech Therapy (ST):** 2 sessions per week
- **Occupational Therapy (OT):** 1 to 2 sessions per week depending on developmental needs

Disclaimer:

This assessment is not a final diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.

Centers' Leading Staff:

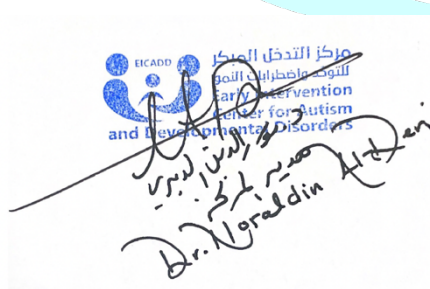

Speech Therapist: Ms. Amira Alomari

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi
