

## Ostathna Center – Jordan

## Developmental Progress Assessment Report

Date of Visit: 28-09-2025

Child's Name: Layan Hawamdeh

Date of Birth: 14-01-2016

Age: 9 years, 8 months

Gender: Female

Guardian: Yasser

## Overview

Layan Hawamdeh visited **Ostathna Center – Jordan** for a developmental progress assessment.

The evaluation showed that **Layan has information-processing delays and intellectual developmental delays**, as well as features of autism due to potential brain abnormalities as reported by parents and described in previous MRI findings and prior medical doctors' assessments.

Ongoing **multidisciplinary therapy is strongly recommended** to address these challenges and support her continued development.

## Recommended Plan

## 1) Development Non-Medicinal Protocol for the Information Processing

- Continue the **development non-medicinal protocol for 4 months**.
- **Reevaluate the child after 4 months**, preferably in person, to establish a new baseline.
- **Continue with the intervention plan** based on the reassessment findings.
- The child **requires speech therapy and occupational therapy to be provided simultaneously** to ensure optimal progress.

## Conclusion

Layan's profile indicates the need for **consistent intervention through Ostathna Center – Jordan**, emphasizing **parallel speech and occupational therapy**.

Following the **4-month protocol** with regular reassessment is recommended to optimize gains in **information processing, communication, and adaptive functioning**.

## Disclaimer

This assessment is **not a final diagnosis but a developmental evaluation based on current observations and previously reported medical findings**.

The child's profile is **open to improvement**, and results may evolve with ongoing therapy and progress.

This report is **issued by Ostathna Center – Jordan** and remains **valid for 4 months** from the date of assessment.

- This report is a **developmental assessment, not a medical diagnosis**.
- The child's developmental profile remains **open to improvement**, and findings may change with consistent therapy and progress.
- The report is **issued by Ostathna Center – Jordan** and remains **valid for 4 months** from the date of assessment.
- Parents are encouraged to follow the recommended plan and schedule follow-up assessments to monitor progress and adjust intervention strategies as needed.

*This report is valid for 4 months from the date of assessment.*
