EICADD Center Ajman

Director's Report on Developmental Progress Assessment

Date of Visit: 21-09-2025

Child's Name: Mohammed-Nayef Alshamsi

Date of Birth: 13-10-2020

Age: 4 years, 11 months

Gender: Male

Guardian: Mr. Nayef

Overview

Mohammed was assessed at our center for developmental progress. He presents with **information processing delays and developmental delays**, which are contributing to **learning difficulties**. Importantly, Mohammed does **not score as a case of autism or ADHD** at this stage. Further analyses are recommended to clarify the underlying contributors to his developmental profile and to guide the next steps in intervention.

Recommended Plan

1. Development Protocol for Information Processing

- Continue with the intervention program for **4 months**, followed by reevaluation, preferably in person.
- At reevaluation, establish a new baseline and refine the plan as necessary.
- Ensure structured developmental and educational support is maintained consistently.

2. Recommended Tests through Neurazon (Canada)

Notes on External Testing

The recommended analyses are performed externally through **Neurazon (Canada)**. These are **suggestions, not obligatory**, and are not conducted directly through our centers. Please refer to their assessment and report.

3. Recommended Therapy

- **Plasticity Rehabilitation Therapy:** To be initiated with **2–3 sessions per week**.
- Therapy should focus on enhancing information processing, learning strategies, and cognitive development to address learning difficulties effectively.

Conclusion

This assessment reflects Mohammed's current developmental status. He demonstrates delays in processing and learning, but with early intervention, proper monitoring, and therapy, he is capable of significant improvement. Continued analyses and consistent therapy will support his developmental trajectory.

Notes on External Testing

The recommended analyses are performed externally through **Neurazon (Canada)**. These are **suggestions, not obligatory**, and are not conducted directly through our centers.

Disclaimer

This assessment is a **developmental evaluation** based on current observations. The child is capable of improvement, and findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the child's developmental profile.

This report is only active for 4 months from the date of assessment.
