

**Director's Report on Developmental Progress Assessment**

**Date of Visit:** 12-08-2025

**Child's Name:** Raed-Mater, Alotaibi

**Date of Birth:** 07-12-2010

**Overview:**

Raed-Mater, Alotaibi was assessed in person at our center. The evaluation indicates **information processing delays**, **global developmental delays**, and **intellectual developmental delays**, with **acquired features of autism**. While these findings point to challenges in multiple areas of cognitive and adaptive functioning, there is potential for improvement with targeted intervention.

Further detailed analysis is recommended to identify the underlying biomedical and physiological factors contributing to the observed delays.

**Recommended Plan:**

**1. Development Protocol for Information Processing:**

- Continue for 4 months, followed by a reevaluation (preferably in person).
- Reassess the plan and establish an updated baseline.
- Continue with the intervention plan based on progress.

**2. Recommended Tests (through Neurazon, Canada):**

- Please refer to their report and assessment. These analyses are not done at EICADD.

**3. Recommended Therapy:**

- **Neuroplasticity Rehabilitation Therapy** – to be considered in **later stages** when the child is ready, focusing on cognitive, social, and communication skill enhancement.

END OF REPORT

**Disclaimer:**

This assessment is not a final diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.
