**Director's Report on Developmental Progress Assessment**

**Date of Visit:** 29-07-2025

**Child's Name:** Raed Husam Ahmad Kokash

**Date of Birth:** 07-03-2019

---

**Overview:**

Raed Husam Ahmad Kokash was assessed at our center on 29-07-2025. The evaluation indicated developmental delays and information processing delays, leading to acquired features of autism. Variants affecting development were identified in the precision health analysis, contributing to the observed delays. The child remains capable of improvement with targeted intervention and continued follow-up.

---

**Recommended Plan:**

**1. Development Protocol for Information Processing:**

- Implement the protocol for 4 months.
  - Reevaluate the child in person after 4 months.
  - Establish a baseline and continue with the intervention plan according to progress.
- 

**Recommendations:**

**2. Main Recommended Analysis:**

- Further analysis will be considered during the next evaluation based on the child's progress.
- 

**3. Recommended Therapy:**

- **Neuroplasticity Sessions:** Intensive sessions to start as soon as possible to support cognitive and developmental progress.
- 

**Disclaimer:**

This assessment is not a final diagnosis but a developmental evaluation based on current observations. The child is capable of improvement, and the findings may change with progress and intervention.
