

EICADD – Ostathna (Jordan)

Director's Report on Developmental Progress Assessment

Date of Visit: 30-09-2025

Child's Name: Mohammed Motasem Daqa

Date of Birth: 23-01-2018 (Age: 7 years, 8 months)

Gender: Male

Guardian: Motasem

Overview:

Mohammed was assessed on 30-09-2025 at Ostathna – Jordan.

The evaluation revealed **information-processing delays and developmental delays leading to hyperlexia-like features**. These features appear to be primarily related to **information-processing challenges and the need for plasticity rehabilitation**, rather than classical hyperlexia subtypes.

Mohammed requires **further analyses** to better understand underlying contributing factors and to guide the next steps of his intervention plan.

Recommended Plan:

1) Development Protocol for Information Processing:

- Continue with the **developmental protocol for 4 months**, then **re-evaluate the child in person**.
- At the follow-up, establish a **baseline** and adjust the intervention plan accordingly.
- Continue with the current intervention protocol as advised.

2) Recommended Tests through Neurazon (Canada):

The recommended tests are conducted through Neurazon (Canada), a bioinformatics company partnered with certified laboratories worldwide. Please refer to the plan provided by Neurazon for further information. Please note that these are recommendations and not obligatory, and they are not conducted through our center – EICADD directly.

3) Recommended Therapy:

- **OT – Plasticity Rehabilitation Therapy:** To be introduced at **later stages** when the child is ready.
- **Rehabilitation Therapy:** Continue as part of the long-term developmental plan.

Notes on External Testing:

The recommended tests are conducted through Neurazon (Canada), a bioinformatics company partnered with certified laboratories worldwide. Please refer to the plan provided by Neurazon for further information. Please note that these are recommendations and not obligatory, and they are not conducted through our center – EICADD directly.

Disclaimer:

This assessment represents a **developmental evaluation based on current observations**. Mohammed is **open to improvement**, and the findings may change with ongoing progress and intervention.

The report remains **active for 4 months** from the date of this assessment.

This report is valid for 4 months from the date of assessment.
