

Director's Report on Developmental Progress Assessment

Date of Visit: 31-05-2025

Child's Name: Iskander Bensib

Date of Birth: 2019-09-16

Age: 68 months (5 years, 8 months)

Gender: Male

Guardian: N/A

Overview:

Iskander Bensib visited our center on 31-05-2025 for a comprehensive developmental assessment. The evaluation revealed **information processing delays** and **developmental delays** that currently do not meet the criteria for an autism diagnosis. Although the child does not score as a case of autism, these delays indicate underlying challenges in integrating sensory and cognitive information, which may impact learning and behavior.

Further analysis is required to understand the causes and to tailor a precise intervention plan that will help Iskander reach his developmental potential.

EICADD

Recommended Plan:

1) Development Protocol for Information Processing

- Initiate an intensive, individualized program focusing on information processing challenges.
- **Reevaluate after 4 months**, preferably through an in-person assessment, to monitor progress and adjust interventions.
- Establish a **clear baseline** to measure improvements and refine the treatment plan.
- Continue with **regular neuroplasticity and cognitive-based interventions** as part of the therapy program.

2) Main Recommended Analysis:

Please refer to their report. These analysis are not done through EICADD but Neurazon Directly.

3) Recommended Therapy after Determining the Causes:

- **Neuroplasticity Rehabilitation Therapy (intensive or weekly to start immediately):**
 - Begin immediately to stimulate cognitive and neuronal pathways.
 - Tailored to Iskander's specific information processing and developmental challenges.

Disclaimer:

This assessment is not a final medical diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.

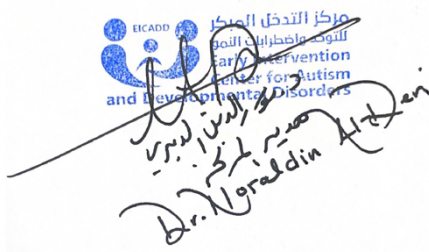

Centers' Leading Staff:

Speech Therapist: Ms. Amira Alomari

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi

EICADD Center Director

A handwritten signature in black ink, reading 'Dr. Noraddin Al-Hadi', is written over a circular stamp. The stamp contains the EICADD logo and the center's name in Arabic and English: 'مركز التدخل المبكر للتوحد واضطرابات النمو Early Intervention Center for Autism and Developmental Disorders'.
