

## **EICADD Center Ajman**

### **Director's Report on Developmental Progress Assessment**

**Date of Visit:** 12-06-2025

**Child's Name:** Mohammed Ibrahim Salim

**Date of Birth:** 14-03-2022

#### **Overview:**

Mohammed Ibrahim Salim was evaluated at our center on 12-06-2025. The assessment revealed **information processing delays, cognitive developmental delays, and acquired features of autism**. These concerns affect his ability to effectively process sensory and cognitive input and respond appropriately during developmental tasks. The signs of autism appear to be acquired rather than rooted in a genetic core, which makes early intervention essential. Additional analysis is required to identify underlying physiological or metabolic causes and to tailor interventions accordingly.

#### **Recommended Plan:**

##### **1. Development Protocol for Information Processing:**

- Initiate a structured developmental intervention protocol targeting information processing and cognitive function.
- Duration: 4 months.
- Conduct a full reevaluation at the end of the 4-month period (preferably in person) to assess progress and adjust the plan accordingly.
- Continue with revised interventions based on the outcomes.

##### **2. Recommended Tests (through Neurazon – Canada):**

- Please refer to their report. These tests are not done at EICADD.

##### **3. Recommended Therapy (post-analysis):**

- Once the underlying causes are reviewed, **intensive neuroplasticity rehabilitation therapy** should begin.
- This specialized intervention is designed to strengthen neural pathways, enhance cognitive function, and support developmental progress.

**Disclaimer:**

This assessment is not a final diagnosis but a developmental evaluation based on current observations and progress. The child is open to improvement, and the findings may change with further interventions. The recommended tests and therapies are external and offered through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.

**Centers' Leading Staff:**

**Speech Therapist:** Ms. Amira Alomari

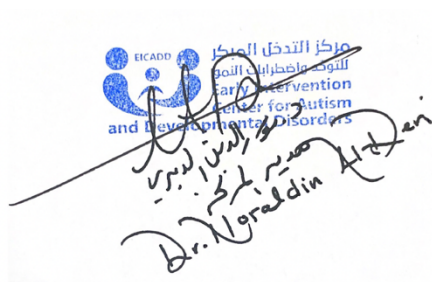

**Occupational Therapist:** Ms. Malak Jaber

**Psychologist and behaviour therapist (Ajman):** Ms. Asmaa Alshanawi

**EICADD Center Director**

**EICADD**

Dr. Noralddin Al-Dari
