

EICADD Center – Developmental Progress Assessment Report

Date of Assessment: 28-06-2025

Child's Name: Mohamed Derar Sabealdir

Date of Birth: 21-05-2020

Age: 5 years and 1 month

Gender: Male

Guardian: Derar

Assessment Summary:

Mohamed Derar Sabealdir was assessed at our center for concerns related to his developmental and cognitive abilities. The assessment findings revealed **information processing delays, intellectual developmental delays, and acquired developmental features** and acquired features of autism that suggest neurodevelopmental challenges.

Further in-depth analysis is required to identify the underlying causes and to establish a tailored intervention plan aimed at supporting Mohamed's developmental needs.

Recommended Plan:

1) Development Protocol for Information Processing:

- Begin a structured developmental protocol focused on enhancing the child's ability to process and respond to sensory and cognitive input.
- Duration: **4 months**, followed by **in-person reassessment**.
- Reevaluate the intervention's effectiveness and establish a baseline to guide future support.

2) Recommended Tests through Neurazon (Canada):

- **Please refer to their report and assessment.**

3) Recommended Therapy:

- Therapy plan to be determined following the completion of the recommended analyses and the next evaluation.

Disclaimer:

This report represents a developmental evaluation and is not a conclusive diagnosis. The child is expected to improve with consistent intervention. The test(s) mentioned are **optional external assessments** offered through **Neurazon (Canada)** and are recommended for a more in-depth understanding of the child's developmental profile. These are **not conducted directly at our center**. Please refer to Neurazon's guidance for more details.

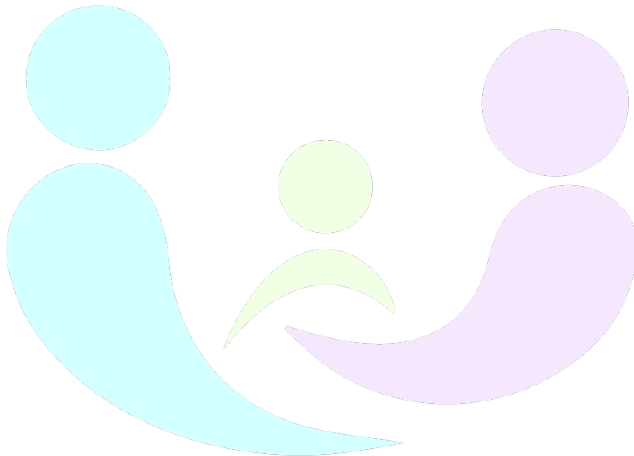

Centers' Leading Staff:

Speech Therapist: Ms. Amira Alomari

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi
