

## Director's Report on Developmental Progress Assessment

**Date of Visit:** 31/07/2025

**Child's Name:** Fahed Dahman

**Date of Birth:** 14/11/2018

**Age:** 6 years 8 months

**Gender:** Male

**Guardian:** Rand

### Overview:

Fahed attended our center for a developmental assessment on 31/07/2025.  
The evaluation revealed:

- **Information Processing Delays**
- **Developmental Delays**
- **Genetic variants affecting cognitive and developmental processing**

Fahed **improved greatly on the first protocol**, showing **strong potential** for continued progress with further structured intervention.

### Recommended Plan

#### 1) Development Protocol for Information Processing

- Continue the **information processing development protocol for 4–6 months**.
- **Reevaluate in person** to establish a new baseline and measure progress.
- Continue with adjustments to the **intervention plan** as needed.

#### 2) Recommended Therapy

- **Neuroplasticity Rehabilitation Therapy – Intensive**, to start immediately
  - Focused on **enhancing information processing, cognitive function, and developmental milestones**

END OF REPORT

## Follow-Up

- **Reevaluation in 4–6 months** to monitor progress and optimize therapy strategies.
- Integration of observed improvements into an **updated intervention plan** after each review.

## Disclaimer:

This report represents a **developmental assessment**, not a final diagnosis. Fahed is **capable of significant improvement**, and findings may change with therapy and ongoing developmental progress.
