
Director's Report on Developmental Progress Assessment

Date of Visit: 02-08-2025

Child's Name: Rayan-Yousef Nassar

Date of Birth: 18-06-2020

Age: 5 years

Gender: Male

Guardian: Yousef

Overview:

Rayan-Yousef Nassar was assessed at our center for developmental progress. The evaluation shows **information processing delays and developmental delays** due to a **variant identified in previous analyses**.

The child has shown **great improvement** since the previous protocol and remains capable of further progress with continued interventions. **Further assessment and monitoring** are recommended to support ongoing development.

Recommended Plan:

1. **Development Protocol for Information Processing**
 - Continue for 4–6 months, followed by in-person reassessment.
 - Reevaluate the plan and establish a new baseline.
 - Continue with the intervention plan according to progress.
 2. **Main Recommended Analysis after 4–6 Months:**
 - **Please refer to their report and assessment. These analyses are not done at EICADD.**
 3. **Main Recommended Therapy:**
 - **Neuroplasticity Rehabilitation Therapy** – twice per week, to start immediately
-

Disclaimer:

This assessment is not a final diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.
