

## **Director's Report on Developmental Progress Assessment**

**Date of Visit:** 28-05-2025

**Child's Name:** Al Hassan Al Hashemi

**Date of Birth:** 11-04-2018

**Age:** 6 years and 1 month

**Gender:** Male

**Guardian:** Alaa

### **Overview:**

Al Hassan was reassessed on May 28th, 2025, following the successful implementation of initial intervention protocols. The child has **shown significant improvement**, particularly in behavioral regulation and engagement. Despite this progress, **information processing delays** and **developmental delays** remain, and have been identified as associated with **genetic variants** presented in previous evaluations. These delays have led to **acquired features of autism**, which remain responsive to intensive therapy. Continued, targeted support is essential for maximizing developmental outcomes.

### **Recommended Plan:**

EICADD

#### **1) Development Protocol for Information Processing**

- Maintain the developmental therapy protocol for an additional **4 months**
- Conduct an **in-person reassessment** at the end of the period
- Re-establish cognitive and sensory-motor baselines
- Continue and adjust the intervention plan based on observed progress

#### **2) Main Recommended Analysis (via Neurazon – Canada):**

*Please note: Please report to their assessment. All testing is conducted externally via Neurazon (Canada) and is not performed at our center. It is highly recommended for precision-based intervention planning.*

### 3) Recommended Therapy After Determining the Causes:

- **Neuroplasticity Therapy (Intensive)**
  - Focused on rewiring neural pathways and supporting cognitive and behavioral flexibility
  - Expected to be delivered **2–3 sessions per week** for optimal results

#### Disclaimer:

This assessment is not a final medical diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.

#### Centers' Leading Staff:

**Speech Therapist:** Ms. Amira Alomari

**Occupational Therapist:** Ms. Malak Jaber

**Psychologist and behaviour therapist (Ajman):** Ms. Asmaa Alshanawi

**EICADD Center Director**

A handwritten signature in black ink, reading "Dr. Noraldin Al-Dani", is written over a blue circular stamp. The stamp contains the EICADD logo and the text "مركز التدخل المبكر للتوحد واضطرابات النمو Early Intervention Center for Autism and Developmental Disorders".
