

Director's Report on Developmental Progress Assessment

Date of Visit: 29-05-2025

Child's Name: Abdulaziz Majid Al Khulafi

Date of Birth: 12-02-2020

Age: 5 years and 3 months

Gender: Male

Guardian: Majid

Overview:

Abdulaziz was assessed at our center for developmental concerns. The assessment revealed **information processing delays** and **intellectual developmental delays**, which have contributed to **acquired features of autism**. The child displays signs that indicate a delay in integrating verbal, cognitive, and processing tasks in a typical age-appropriate manner. These signs are considered acquired and can improve significantly with targeted and timely intervention.

Recommended Plan:

1) Development Protocol for Information Processing

- Initiate a **non-chemical development protocol**
- Continue the intervention for **4 months**
- Reevaluate the child's progress in person to set a clear baseline and monitor improvement
- Adapt and continue sessions based on the response

2) Main Recommended Analysis (via Neurazon – Canada):

Note: Please refer to their own assessment. These tests are suggested through Neurazon (Canada) and are external to our center.

3) Recommended Therapy:

- **Neuroplasticity Rehabilitation Therapy**
 - Recommended for later stages, to begin after 2 months based on progress
- **Occupational and Rehabilitation Speech Therapy**
 - Can be pursued locally in the child's home country
 - Focused on expressive and receptive communication, motor planning, and sensory integration

Disclaimer:

This assessment is not a final diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.

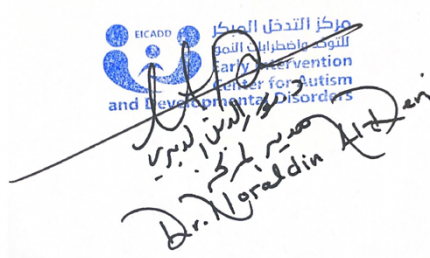

Centers' Leading Staff:

Speech Therapist: Ms. Amira Alomari

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi
