

Director's Report on Developmental Progress Assessment

Date of Visit: 10-05-2025

Child's Name: Malak AL Masri

Date of Birth: 2019-04-08

Age: 6 years

Gender: Female

Guardian: Kalthoum

Overview:

Malak AL Masri visited our center for a developmental progress assessment. The evaluation indicates that Malak has made significant improvement following the first protocol. However, she continues to present with **information processing delays and developmental delays**. Importantly, Malak does **not meet the diagnostic criteria for Autism Spectrum Disorder or Attention Deficit Hyperactivity Disorder (ADHD)**.

These findings suggest the delays are isolated and responsive to intervention, and do not align with a neurodevelopmental disorder diagnosis at this stage.

Recommended Plan:

1. Development Protocol for Information Processing:

- Continue with the development protocol for a duration of **4 months**.
- A **reevaluation is recommended in person** after this period to measure progress.
- During this period, establish a **clear baseline** and monitor for improvement.

2. Recommended Tests through Neurazon (Canada):

- *Please refer to the plan provided by Neurazon for further information. Please note that these are recommendations and not obligatory, and they are not conducted through our centers directly.*

3. Recommended Therapy:

- **Neuroplasticity Rehabilitation Therapy (Intensive):**
 - **Frequency:** 2 sessions per week

Conclusion:

This is a developmental assessment, not a final medical diagnosis. Malak AL Masri has shown promising improvement and is open for further progress. Continued intervention and appropriate reassessment will help ensure sustained developmental gains.

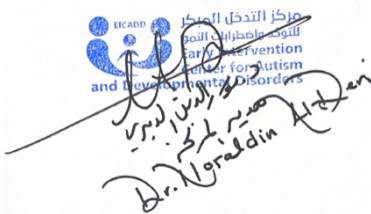

Center's Leading Staff:

Speech Therapist: Ms. Amira Alomari

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist: Ms. Asmaa Alshanawi
