

Director's Report on Developmental Progress Assessment

Date of Visit: 26-08-2025

Child's Name: Saif Addeen Munzer Faroun

Date of Birth: 2016-08-30

Gender: Male

Guardian: Munzer

Overview

Saif was assessed for developmental functioning. Findings indicate **information processing delays** with broader **developmental delays** leading to **features of intellectual developmental delay** and **minor autistic features**; however, he **does not meet diagnostic criteria for autism**. Learning difficulties are present and require structured support. **Further analyses** are recommended to clarify contributing biological factors and to optimize the intervention plan.

Recommended Plan

1) Development Protocol for Information Processing

- Implement a structured protocol for **4 months** (attention, processing speed, working memory, comprehension, executive skills).
- **Reevaluate in person** after 4 months to establish a clear baseline and adjust goals.
- Continue and adapt the intervention according to measured progress.

2) Main Recommended Analyses (through Canada – Neurazon)

The tests listed are provided through **Neurazon (Canada)**. They are **recommendations, not obligatory**, and are **not conducted directly through our center**. Please refer to their report and assessment.

3) Therapy

- **Neuroplasticity Rehabilitation Therapy: 2–3 sessions per week**, focusing on processing efficiency, language comprehension, executive functioning, and self-regulation.
- **School & Therapy Integration:**
 - Begin/continue **Speech Therapy** and **Occupational Therapy** coordinated with school supports.

- Classroom accommodations: extra processing time, stepwise instructions, visual organizers/checklists, reduced distractions, movement breaks, and modified testing with extended time/quiet space.
- **Home Program (15–20 min daily):** reading-for-meaning activities, sequencing/turn-taking games, multisensory spelling/number practice, and calm-breathing routines.

Conclusion

This document reflects a developmental assessment. Saif is **capable of improvement** with consistent therapy, appropriate school accommodations, family engagement, and the recommended analyses. Findings may evolve with progress and at the next in-person reassessment.

Notes on External Testing

The tests listed above are provided through **Neurazon (Canada)**. They are **recommendations, not obligatory**, and are **not conducted directly through our center**.

Disclaimer

This is a **developmental evaluation**, not a final medical diagnosis. The plan may change with progress, further testing, and clinical review.
