
Director's Report on Developmental Progress Assessment

Date of Visit: 30/07/2025

Child's Name: Haytham-Fahd Alrawaili

Date of Birth: 18/10/2014

Age: 10 years 9 months

Gender: Male

Guardian: Fahd

Overview:

Haytham-Fahd visited our center for a developmental assessment on 30/07/2025.
The evaluation indicated:

- **Information Processing Delays**
- **Global Developmental Delays**
- **Intellectual Developmental Delays**

It is important to note that **Haytham-Fahd does not meet the criteria for a formal autism diagnosis**. His developmental challenges are currently **manifesting as delays in information processing, cognition, and overall development**, requiring further assessment to determine underlying causes and optimal intervention strategies.

Recommended Plan:

1) Development Protocol for Information Processing

- Implement a **4-month intervention protocol** focused on improving information processing.
 - **Reevaluate after 4 months**, preferably in person, to establish a baseline and monitor progress.
 - Continue with an **adjusted intervention plan** depending on the reassessment results.
-

2) Main Recommended Analyses (via Neurazon, Canada):

Please refer to their report and assessment, these analyses are not done at EICADD.

3) Recommended Therapy:

- **Neuroplasticity Rehabilitation Therapy**
 - Begin as **soon as possible** to stimulate cognitive and developmental improvements
 - Focus on **information processing, attention, and intellectual growth**

Follow-Up Plan:

- Reassessment is recommended every **4–5 months**
- Adjust therapy and protocols based on child's **response and progress**
- Integrate **results from Neurazon analyses** to enhance intervention precision

Disclaimer:

This is **not a final medical diagnosis**, but a **developmental assessment** based on current observations. The child is **capable of improvement**, and findings are **subject to change with progress and therapy**.

The **recommended tests are external and provided through Neurazon (Canada)**. These are **suggestions, not mandatory**, and are intended to give a **deeper understanding of the child's developmental profile**. Please refer to the **Neurazon plan** for more details.

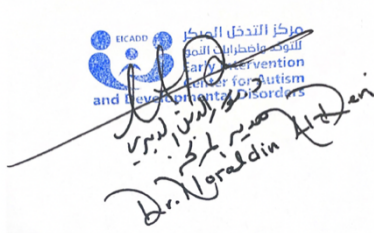

Centers' Leading Staff:

Speech Therapist: Ms. Amira Alomari

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi

EICADD Center Director
