

## Director's Report on Developmental Progress Assessment

**Date of Visit:** June 30, 2025

**Child's Name:** Majd Sleiman

**Date of Birth:** February 12, 2018

**Age:** 7 years

**Gender:** Male

**Guardian:** Layal

### Overview:

Majd Sleiman was assessed on **June 30, 2025**, for developmental and cognitive functioning. The evaluation revealed **information processing delays** and **developmental delays**, which have contributed to the emergence of **Hyperlexia Type 2, leaning closer to Type 3**, along with **acquired features of autism**.

While the child demonstrates certain behaviors associated with autism, **he does not meet the criteria for a classical diagnosis of Autism Spectrum Disorder (ASD)**. These acquired features are likely secondary to cognitive and processing challenges and should be closely monitored through continued evaluation.

EICADD

### Recommended Plan:

1. **Development Protocol for Information Processing:**
  - Implement a structured protocol targeting visual-auditory integration, attention regulation, and symbolic understanding.
  - **Duration:** 4 months, followed by a re-evaluation, preferably conducted in person.
  - The goal is to establish a developmental baseline and track progress over time.
2. **Recommended Therapy (To Begin at Later Stages):**
  - **Neuroplasticity Therapy – Intensive Format**
    - This therapy should be introduced in later stages to help strengthen brain connectivity and reduce the acquired features of autism.

### Follow-Up Plan:

- Reassessment is advised every **4 months** to monitor cognitive and behavioral development and adjust the intervention plan accordingly.

**Disclaimer:**

This document reflects a developmental assessment and not a final diagnosis. The child's case remains open for improvement and re-evaluation. The recommendations serve as a proactive plan to better understand and support Zaid's development. All recommended tests are offered externally through Neurazon (Canada) and are **not obligatory**, but advised for clearer insight. Please refer to the Neurazon protocol for further guidance.

**Centers' Leading Staff:**

**Speech Therapist:** Ms. Amira Alomari

**Occupational Therapist:** Ms. Malak Jaber

**Psychologist and behaviour therapist (Ajman):** Ms. Asmaa Alshanawi

**EICADD Center Director**
