

Date of Assessment: 25-06-2025
Child's Name: Amjad Nedal Kutkut
Date of Birth: 2012-04-12
Age: 158 months
Gender: Male
Guardian: Nedal

Assessment Summary:

Amjad was assessed on 25-06-2025. The child shows signs of **information processing delays** and **developmental delays** that have contributed to **hyperlexia**, closer to **Hyperlexia Type 3**, with acquired features of autism. However, he does **not meet the criteria for autism**. Further analysis is required to determine the underlying factors and continue a personalized developmental support plan.

Recommended Plan:

1. Development Protocol for Information Processing

- Initiate a targeted, non-medicinal developmental protocol.
- Reevaluate the child after **4 months**, preferably in person.
- Establish a new baseline and adapt the plan accordingly.
- Continue the protocol depending on the progress observed.

2. Recommended Tests (through Neurazon – Canada):

Disclaimer: These tests are not performed at EICADD. Please refer to the official report and guidance provided by **Neurazon (Canada)**. These recommendations are external and offered as supportive suggestions.

Disclaimer:

This assessment is not a final medical diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.
