

Director's Report on Developmental Progress Assessment

Date of Visit: 30/07/2025

Child's Name: Ziyad-Saeed Alzahrani

Date of Birth: 10/04/2020

Age: 5 years 3 months

Gender: Male

Guardian: Saeed

Overview:

Ziyad-Saeed visited our center for a comprehensive developmental assessment. The evaluation indicated:

- **Information Processing Delays**
- **Global Developmental Delays**
- **Acquired Features of Autism** (secondary to cognitive and developmental delays)

It is important to highlight that **Ziyad-Saeed does not meet the criteria for a formal autism diagnosis**. His presentation reflects **acquired features of autism** and **cognitive delays** caused by his underlying developmental challenges.

The child **requires further assessment** to understand the contributing factors to his delays and to establish a targeted intervention plan.

Recommended Plan:

1) Development Protocol for Information Processing

- Implement a **4-month intervention protocol** focused on improving information processing.
- **Reevaluate in 4 months**, preferably in person, to measure progress and establish a new baseline.
- Continue and adjust the **intervention plan** based on response.

2) Main Recommended Analyses (via Neurazon, Canada):

- Please refer to their report and assessment. These analyses are not done at EICADD.

3) Recommended Therapy:

- **Neuroplasticity Rehabilitation Therapy**
 - To be **initiated as soon as possible**, with intensity increasing in later stages based on readiness.
 - Focus on improving **cognitive processing, attention, and developmental milestones**.

Follow-Up Plan:

- Reassessment every **4–5 months**
- Progress review and **adjustment of therapy and interventions** based on results
- Incorporate **test outcomes** from Neurazon to personalize future protocols

Disclaimer:

This assessment is **not a final diagnosis** but a **developmental evaluation** based on current observations. The child is **open to improvement**, and the findings may change with intervention.

The **recommended tests are external and provided through Neurazon (Canada)**. These are **suggestions, not obligatory**, and are intended to support a **deeper understanding of the child's developmental profile**. Please refer to the **plan provided by Neurazon** for further details.

Centers' Leading Staff:

Speech Therapist: Ms. Amira Alomari

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi

EICADD Center Director

Dr. Nouraldin Al-Hadani
