

## Director's Report on Developmental Progress Assessment

**Date of Visit:** 30/07/2025

**Child's Name:** Saleh-Nasser Abushunnar

**Date of Birth:** 08/05/2023

**Age:** 2 years 2 months

**Gender:** Male

**Guardian:** Nasser

### Overview:

Saleh-Nasser attended our center for a developmental assessment on 30/07/2025.  
The evaluation revealed:

- **Information Processing Delays**
- **Developmental Delays**
- **Acquired Features of Autism, but does not currently meet the criteria for an autism diagnosis**

These findings indicate a developmental profile with **delays that can be improved through early intervention and structured therapy**. Further assessment is required to track progress and better understand the underlying causes.

### Recommended Plan

#### 1) Development Protocol for Information Processing

- Continue the **information processing development protocol** for **4 months**.
- **Reevaluate in person** after 4 months to establish a new baseline.
- Continue and adjust the intervention plan according to progress.

#### 2) Main Recommended Analysis

- **Further analyses may be considered after the next assessment** based on the child's progress and needs.

### 3) Recommended Therapy

- **Speech Therapy (ST): 2 sessions per week**
- **Occupational Therapy (OT): 1–2 sessions per week**
- **Mitotherapy: 2 sessions per week**

These interventions aim to **enhance cognitive processing, speech and language development, and overall neurodevelopmental progress.**

### Follow-Up

- **Reassessment every 4 months** to monitor progress and adjust therapy.
- Consider **additional metabolic or neuronal growth factor analyses** if indicated at the next evaluation.

### Disclaimer:

This report reflects a **developmental assessment**, not a final diagnosis. The child is **capable of improvement**, and findings may change with therapy and time.

### Disclaimer:

This is **not a final medical diagnosis**, but a **developmental assessment** based on current observations. The child is **capable of improvement**, and findings are **subject to change with progress and therapy**.

The **recommended tests are external and provided through Neurazon (Canada)**. These are **suggestions, not mandatory**, and are intended to give a **deeper understanding of the child's developmental profile**. Please refer to the **Neurazon plan** for more details.

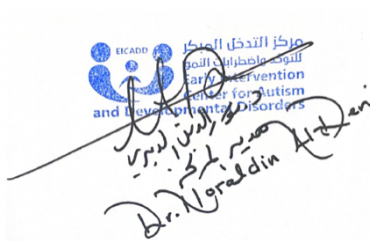

### Centers' Leading Staff:

**Speech Therapist:** Ms. Amira Alomari

**Occupational Therapist:** Ms. Malak Jaber

**Psychologist and behaviour therapist (Ajman):** Ms. Asmaa Alshanawi

**EICADD Center Director**

Dr. Nouraldin Al-Dan
