
Director's Report on Developmental Progress Assessment

Date of Visit: 16-07-2025

Child's Name: Abdullah Abdulaziz Al Altwirji

Date of Birth: 12-01-2016

Overview:

Abdullah Abdulaziz Al Altwirji visited our center for a developmental evaluation. The child presents with **information processing delays and developmental delays**, which have led to **hyperlexia patterns closer to Hyperlexia Type 2**, though he has not fully developed this type yet. With appropriate intervention, there is a strong possibility of transitioning towards **Hyperlexia Type 3**, indicating a promising prognosis. A comprehensive intervention plan and further assessment are necessary.

Recommended Plan:

1. **Development Protocol for Information Processing:**
 - Continue the protocol for **4 months**, followed by in-person reassessment.
 - Establish a developmental baseline during the reevaluation.
 - Continue tailored intervention strategies accordingly.
 2. **Recommended Analyses (via Neurazon – Canada):**
 - **Please refer to their report and assessment. These analyses are done not done at EICADD.**
 3. **Recommended Therapy:**
 - Continue therapy with local specialists in the child's home area.
 - Begin **neuroplasticity rehabilitation therapy** as soon as possible, at an **intensive frequency**, to support language, reading comprehension, and executive functioning skills.
-

Disclaimer:

This assessment is not a final diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through **Neurazon (Canada)**. These are suggestions, not obligatory, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.

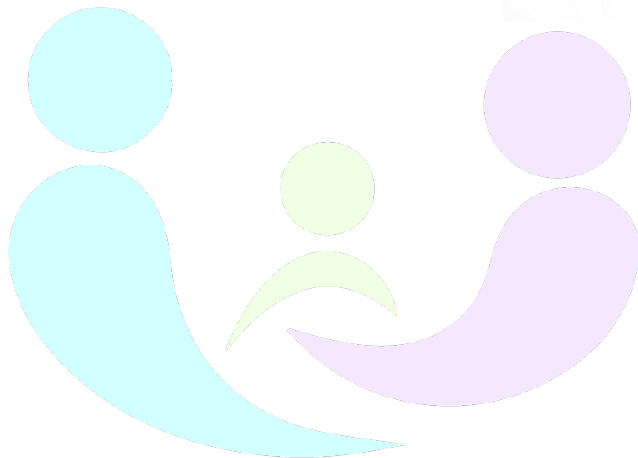

Centers' Leading Staff:

Speech Therapist: Ms. Amira Alomari

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi
