

## Director's Report on Developmental Progress Assessment

**Date of Visit:** 01-10-2025

**Child's Name:** Naya Abed Alhalawani

**Date of Birth:** 02-02-2022

**Gender:** Female

**Guardian:** Abed

---

## Overview

Naya Abed Alhalawani was assessed at our center on 01 October 2025. The evaluation indicated **information-processing delays** and **global developmental delays**, which have resulted in **cognitive developmental-delay features** and **acquired features of autism**. These findings highlight the need for further analyses to identify the underlying biomedical, cognitive, and environmental contributors to her developmental profile.

---

## Recommended Plan

### 1) Development Protocol for Information Processing

- Implement the tailored development protocol for **4 months**.
- Re-evaluate the child after 4 months—preferably **in person**—to establish a baseline and adjust the protocol according to her progress.
- Continue with the intervention plan thereafter, adapting it as the child responds to therapy.

---

### 2) Main Recommended Analyses – Conducted through Neurazon (Canada)

#### Notes on External Testing:

The recommended tests are conducted through **Neurazon (Canada)**, a bioinformatics company partnered with certified laboratories worldwide. These tests are external to our center. **Please note that they are recommendations and not obligatory**, and they are not carried out directly by EICADD. Parents are encouraged to refer to the plan provided by Neurazon for further details.

---

### 3) Recommended Therapy

- **Rehabilitation Therapy:** Continue with an intensive therapy plan consisting of:
  - **2 Speech-Therapy (ST) sessions per week**
  - **2 Occupational-Therapy (OT) sessions per week**
  - **2 Language-Therapy (LT) sessions per week**

### Conclusion

This assessment reflects the child's current developmental status. Early and consistent intervention can significantly enhance outcomes for Naya. Following the above plan—including both therapy and biomedical analyses—will allow for a more personalized and effective approach to her developmental needs.

### Disclaimer

This assessment is **not a final diagnosis** but a developmental evaluation based on current observations. Naya Abed Alhalawani is open to improvement, and the findings may change with progress and intervention.

The recommended tests are external and provided through **Neurazon (Canada)**. These are suggestions, **not obligatory**, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information.

These tests are not conducted directly through our center.

This report remains **active for 4 months** from the date of assessment.

*This report is valid for 4 months from the date of assessment.*
