

## Director's Report on Developmental Progress Assessment

**Date of Visit:** 28-06-2025

**Child's Name:** Mariam-Khaled Almakhzomi

**Date of Birth:** 07-01-2016

**Age:** 9 years

**Gender:** Female

**Guardian:** Khaled

### Overview:

Mariam was assessed at our center and exhibits **information processing delays** along with **learning difficulties**. These challenges are impacting her academic and cognitive performance. Further analysis is needed to determine the underlying causes and tailor a plan to support her improvement. This assessment is performed by Ostathna for Education.

### Recommended Plan:

- 1. Development Protocol for Information Processing**
  - Duration: 4 months
  - Reassessment to be conducted in person
  - Establish a baseline and adjust the intervention accordingly
- 2. Recommended Tests:**
  - Specific tests to be determined during the next assessment based on progress and updated clinical findings
- 3. Recommended Therapy (as Needed):**
  - **Mitotherapy:** 2 light therapy sessions per week
  - **Neuroplasticity Rehabilitation:** To be considered in later stages if required

### Centers' Leading Staff:

**Speech Therapist:** Ms. Amira Alomari

**Occupational Therapist:** Ms. Malak Jaber

**Psychologist and behaviour therapist (Ajman):** Ms. Asmaa Alshanawi

**EICADD Center Director**

Dr. Noraldin Al-Dani
