

Director's Report on Developmental Progress Assessment

Date of Visit: 16-08-2025

Child's Name: Hamad-Akram Adam

Date of Birth: 21-11-2017

Sex: Male

Guardian: Akram

Overview

Hamad-Akram was assessed in person at our center. Findings indicate **information processing delays only**. The child is open to improvement, and **further assessment** is recommended to identify contributing factors and refine the intervention plan.

Recommended Plan

1. Development Non-medicinal Protocol for Information Processing

- Implement for **4 months**, then reassess in person.
- Reevaluate the plan and establish a clear baseline.
- Continue and adjust the intervention according to observed progress.

2. Main Recommended Analyses (through Neurazon, Canada)

Recommended Tests through Neurazon (Canada): Please refer to the plan provided by Neurazon for further information. Please note that these are recommendations and not obligatory, and they are not conducted through our centers directly.

3. Recommended Therapy

- **Neuroplasticity rehabilitation therapy: 2–3 sessions per week.**

Disclaimer

This assessment is **not a final diagnosis** but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through **Neurazon (Canada)**. These are suggestions, not obligatory, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are **not conducted directly through our center**.
