

Director's Report on Developmental Progress Assessment

Date of Visit: 21-12-2019

Child's Name: Yaman Qatouni

Date of Birth: 21-12-2019

Overview:

Yaman Qatouni was reassessed following the initial phase of intervention and has shown notable improvement. Despite this progress, the child continues to exhibit signs of information processing delays and developmental delays. Genetic variants previously identified appear to contribute to acquired features of autism. Ongoing support and targeted assessment are needed to build on this improvement and determine the next steps for intervention.

Recommended Plan:

1. Development Non-Medicinal Protocol for Information Processing:

- Continue with a structured, non-medicinal protocol focused on enhancing cognitive processing.
- Maintain this plan for 4–6 months.
- Reevaluate the child preferably in person at the end of this period to monitor progress.
- Establish a developmental baseline during reassessment to inform future intervention.

2. Main Recommended Analysis for Next Evaluation (through Neurazon – Canada):

- **Please refer to their report and assessment. These tests are not done at EICADD.**

3. Main Recommended Therapy:

- **Neuroplasticity Rehabilitation Therapy:**
 - Frequency: 2–3 sessions per week (intensive if possible).
 - To begin immediately to support further developmental and neurological improvement.

Disclaimer:

This assessment is not a final diagnosis but a developmental evaluation based on current observations. Yaman is demonstrating encouraging signs of improvement, and the plan may evolve with continued intervention. The recommended tests are conducted externally through Neurazon (Canada). These suggestions are not mandatory and are provided to support a deeper

understanding of the child's developmental needs. Please refer to Neurazon for specific procedures. These tests are not conducted directly through our center.

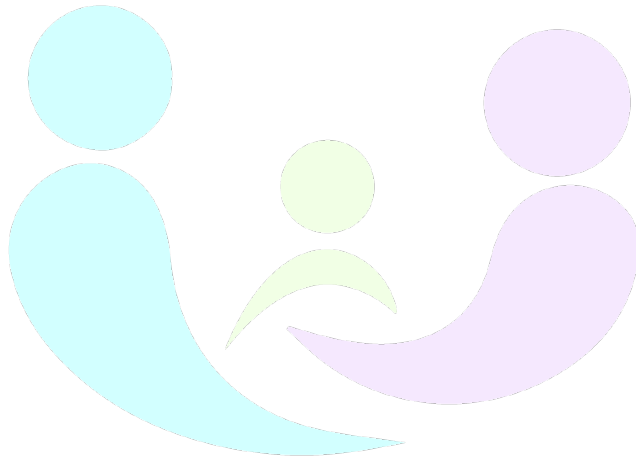

Centers' Leading Staff:

Speech Therapist: Ms. Amira Alomari

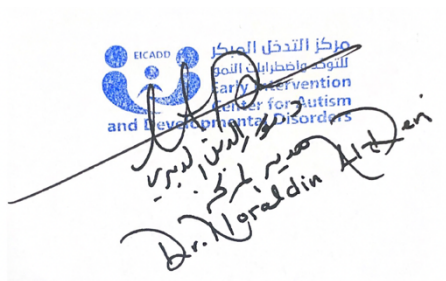

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi
