

## Director's Report on Developmental Progress Assessment

**Date of Visit:** 23-06-2025

**Child's Name:** Amir Mustafa

**Date of Birth:** 2020-10-06

### Overview:

Amir Mustafa was assessed at our center and presented with signs of **information processing delays** and **developmental delays**, which have led to **acquired features of autism**. However, the child does **not score as a true case of autism**. These findings suggest that his developmental challenges are modifiable, and the child requires further analysis and continued intervention.

### Recommended Plan:

#### 1. Development Protocol for Information Processing

- Implement for 4 months
- Reevaluate the child, preferably in person
- Reevaluate the plan and establish a developmental baseline
- Continue with the appropriate intervention plan

#### 2. Recommended Tests for Later Stages (after 2 months):

- **Recommended through Canada:** *Neuronal Growth Factors Analysis – Neurazon (Canada)*

A more detailed analysis of the absorption

Sample: Hair

Turnaround: 2 months business days

Frequency: Repeated every 6–12 months

### Disclaimer for Recommended Tests:

The tests listed above are **external assessments** provided through **Neurazon (Canada)** and are **not conducted directly through our center**. These tests are **optional** and offered as part of a broader plan to better understand the child's developmental profile. They are **not obligatory** and should be pursued **only if the parents choose to proceed**. Please refer to the official plan provided by Neurazon for further details.

### 3. Recommended Therapy after Determining the Causes:

- 2 sessions of Speech Therapy (ST)
- 2 sessions of Occupational Therapy (OT)
- 2–3 sessions of Mitotherapy (LT) per week

#### **Disclaimer:**

This assessment is not a final medical diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.

#### **Centers' Leading Staff:**

**Speech Therapist:** Ms. Amira Alomari

**Occupational Therapist:** Ms. Malak Jaber

**Psychologist and behaviour therapist (Ajman):** Ms. Asmaa Alshanawi

**EICADD Center Director**

**EICADD**

A handwritten signature in black ink, reading "Dr. Noraldin Al-Dani", is written over a blue stamp. The stamp contains the EICADD logo and the text "مركز التدخل المبكر للتوحد واضطرابات النمو Early Intervention Center for Autism and Developmental Disorders".
