
Director's Report on Developmental Progress Assessment

Date of Visit: 29-07-2025

Child's Name: Yasmeen Abu Hamad

Date of Birth: 03-02-2020

Overview:

Yasmeen Abu Hamad was assessed at our center on 29-07-2025. The evaluation revealed information processing delays and developmental delays leading to learning difficulties. A developmental variant is affecting the child's progress. The child is capable of improvement, and further analyses may be required in future assessments to better understand the underlying factors.

Recommended Plan:

1. Development Protocol for Information Processing:

- Implement the protocol for 4 months.
 - Reevaluate the child in person after 4 months.
 - Establish a baseline and continue with the intervention plan according to progress.
-

Recommendations:

2. Main Recommended Analysis:

- Further analyses may be needed in future evaluations, depending on progress and new findings.
-

3. Recommended Therapy:

- **Neuroplasticity Rehabilitation Therapy:** Intensive sessions to start as soon as possible to enhance developmental and cognitive outcomes.
-

Disclaimer:

This assessment is not a final diagnosis but a developmental evaluation based on current observations. The child is capable of improvement, and the findings may change with continued intervention and therapy.
