

Director's Report on Developmental Progress Assessment

Date of Visit: 23-06-2025

Child's Name: Mohammad-Basil Allaham

Date of Birth: 30-11-2020

Overview:

Mohammad-Basil was assessed at our center due to concerns regarding his developmental trajectory. The evaluation revealed **information processing delays** and **regressive cognitive developmental delays**, which have contributed to **acquired features of autism**. These signs suggest an atypical developmental pattern that requires further analysis to clarify contributing factors and guide a targeted intervention plan.

Recommended Plan:

1. Development Protocol for Information Processing:

- Implement a tailored protocol focused on enhancing information processing over a **4-month period**.
- Schedule a reevaluation after 4 months, preferably in person.
- Use the follow-up to establish a clearer developmental baseline and adjust the intervention strategy as needed.

2. Recommended Tests through Neurazon (Canada):

Please refer to the plan provided by Neurazon for further information. These tests are external recommendations, not mandatory, and not conducted directly through our centers.

3. Recommended Therapy After Determining the Causes:

- **1–2 Speech Therapy (ST)** sessions per week initially, with the plan to increase frequency as the child shows progress
- **2 Occupational Therapy (OT)** sessions per week
- **1–2 mito Therapy (LT)** sessions weekly (mitotherapy approach)

Disclaimer:

This assessment is not a final medical diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the

child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.

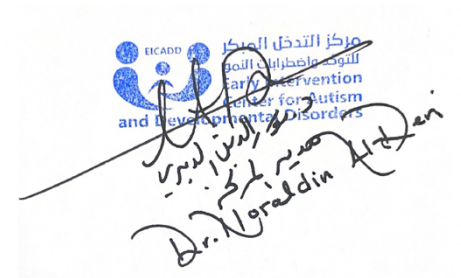

Centers' Leading Staff:

Speech Therapist: Ms. Amira Alomari

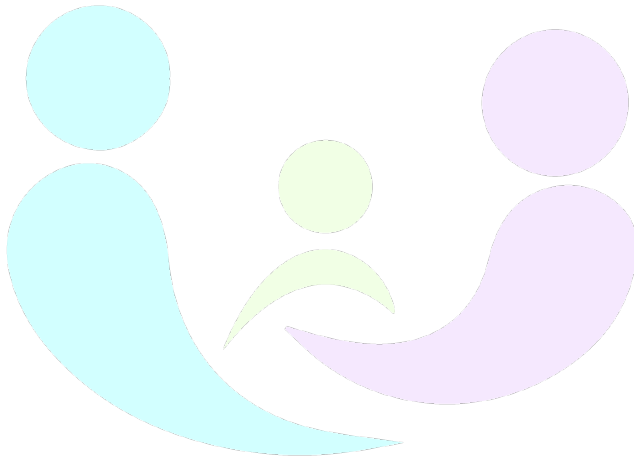

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi
