

Director's Report on Developmental Progress Assessment

Date of Visit: 29-06-2025

Child's Name: Abdullah Yazan Al-Omary

Date of Birth: 01-10-2018

Age: 6 years

Gender: Male

Guardian: Yazan

Overview:

Abdullah was assessed at our center and has **shown significant improvement** since the implementation of the first step of his developmental plan. He presents with **information processing delays**, primarily attributed to **enzymatic and genetic variants** identified during previous evaluations. Continued follow-up and deeper analysis are essential to ensure sustained progress and to further refine his intervention protocol.

Recommended Plan:

1. **Development Protocol (Non-Medicinal) for Information Processing**
 - Duration: 4–6 months
 - Reassessment preferably conducted in person
 - Establish a new baseline and continue with individualized developmental support
2. **Main Recommended Analyses (through Neurazon – Canada):**
 - Please refer to their report and assessment.
3. **Recommended Therapy:**
 - **Neuroplasticity Rehabilitation Therapy** (available in UAE or Jordan when accessible)
 - **Mitotherapy:** 2 sessions per week

Disclaimer:

This document reflects a developmental assessment and not a final diagnosis. The child's case remains open for improvement and re-evaluation. The recommendations serve as a proactive plan to better understand and support Zaid's development. All recommended tests are offered externally through Neurazon (Canada) and are **not obligatory**, but advised for clearer insight. Please refer to the Neurazon protocol for further guidance.

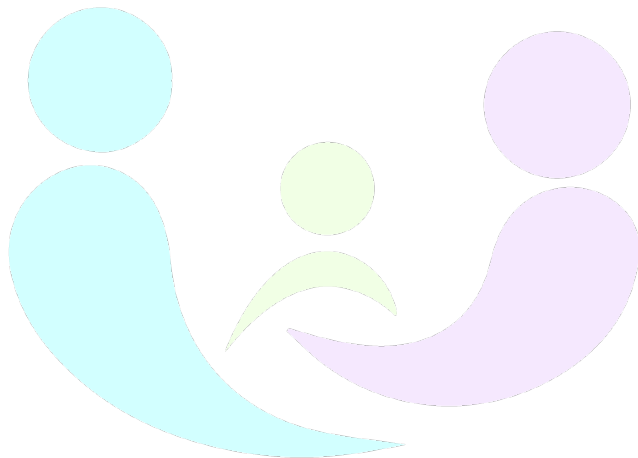

Centers' Leading Staff:

Speech Therapist: Ms. Amira Alomari

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi
