

Director's Report on Developmental Progress Assessment

Date of Visit: 25-05-2025

Child's Name: Karam Sami Lasassmeh

Date of Birth: 07-09-2018

Age: 6 years

Gender: Male

Guardian: Sami

Overview:

Karam Sami Lasassmeh was assessed at our center on May 25th, 2025. The evaluation indicated **information processing delays, developmental delays, and learning difficulties**, all of which are contributing to **acquired features of autism**. However, the child **does not meet the full criteria for a clinical diagnosis of autism**. These features appear to be the result of delayed or atypical developmental processing rather than a neurodevelopmental disorder in itself.

Further analysis is needed to identify the root causes and to guide a more targeted and effective therapeutic plan.

Recommended Plan:

1. **Development Protocol for Information Processing:**
 - Apply the developmental protocol for **4 months**
 - Conduct an **in-person reevaluation** at the end of the period
 - Reestablish a clinical and developmental baseline and modify the intervention accordingly
2. **Main Recommended Analysis (conducted through Neurazon – Canada):**

Please refer to their assessment. These analyses are conducted externally by Neurazon (Canada) and are not obligatory, but they are strongly recommended to guide a precision-based treatment plan.

3. **Recommended Therapy After Determining the Causes:**
 - **Mitotherapy Therapy (intensive protocol)** – To support cellular and metabolic regulation
 - **Neuroplasticity Therapy** – To begin in **September**, based on readiness
 - **Occupational Therapy (OT)** – To support sensory integration, motor coordination, and learning adaptability

Disclaimer:

This assessment is not a final diagnosis but a developmental evaluation based on current observations. The child is open to improvement, and the findings may change with progress and intervention. The recommended tests are external and provided through Neurazon (Canada). These are suggestions, not obligatory, and are intended to support a deeper understanding of the child's developmental profile. Please refer to the plan provided by Neurazon for further information. These tests are not conducted directly through our center.

Centers' Leading Staff:

Speech Therapist: Ms. Amira Alomari

Occupational Therapist: Ms. Malak Jaber

Psychologist and behaviour therapist (Ajman): Ms. Asmaa Alshanawi

EICADD Center Director

EICADD

A handwritten signature in black ink, reading "Dr. Noralddin Al-Hadi", is written over a blue circular stamp. The stamp contains the EICADD logo and the text "مركز التدخل المبكر للتوحد واضطرابات النمو Early Intervention Center for Autism and Developmental Disorders".
