

## EICADD Center Ajman

### Director's Report on Developmental Progress Assessment

**Date of Visit:** 09-12-2025

**Child's Name:** AISHA AMUR ALMAQBALI

**Date of Birth:** 11-07-2020

**Gender:** F

**Guardian:** AMUR

---

#### Overview

Aisha visited our center for a follow-up developmental assessment. The evaluation indicates **clear improvement in the first intervention phase**. She continues to present with **information processing delays** and **cognitive developmental delays**, which have led to **acquired autism features**.

Previously conducted **external genetic and biological analyses through Neurazon** identified **variants affecting neurodevelopment**, confirming that the underlying cause is **biological in nature**.

Many of her **previous symptoms are improving rapidly**, which strongly indicates a **high potential for recovery and developmental normalization**. The current clinical profile reflects **developmental delays rather than true classical autism**. However, **further assessment remains necessary** to continue guiding the intervention plan accurately.

---

#### Recommended Plan

##### 1) Development Protocol for Information Processing

- Apply the protocol for **4 months**, followed by a comprehensive reassessment, preferably **in person**.
- Reevaluate the intervention plan and establish a **new developmental baseline**.
- Continue with the current **structured intervention program**.

---

##### 2) Main Recommended Analysis (External – Through Neurazon Canada)

The recommended tests are conducted through **Neurazon (Canada)**, a bioinformatics company partnered with certified laboratories worldwide.

Please refer to the plan provided by Neurazon for further information.

Please note that these are **recommendations and not obligatory**, and they are **not conducted through our centers directly**.

### 3) Recommended Therapy

- **Plasticity rehabilitation therapy**, with a frequency of **2–3 sessions per week**, based on current tolerance and progress.

### Notes on External Testing

The recommended tests are conducted through **Neurazon (Canada)**, a bioinformatics company partnered with certified laboratories worldwide.

Please refer to the plan provided by Neurazon for further information.

Please note that these are **recommendations and not obligatory**, and they are **not conducted through our centers directly**.

### Disclaimer

This assessment is **not a final diagnosis** but a developmental evaluation based on current observations. The child is **open to improvement**, and the findings may change with continued intervention and progress.

The recommended tests are **external and optional**, and they are **not conducted through our center directly**.

**This report is valid for 4 months from the date of assessment only.**

### Signature:

EICADD Center Ajman Director

### Centers' Leading Staff:

**Speech Therapist:** Ms. Amira Alomari

**Occupational Therapist:** Ms. Malak Jaber

**Psychologist and behaviour therapist (Ajman):** Ms. Asmaa Alshanawi

**EICADD Center Director**

A handwritten signature in black ink, reading "Dr. Noraddin Al-Din", is written over a blue circular stamp. The stamp contains the EICADD logo and the text "مركز التدخل المبكر للتوحد واضطرابات النمو Early Intervention Center for Autism and Developmental Disorders".
